

Redefine what's possible with your custom mix of deposit solutions.

We'll help you break the mold.

ENDLESS POSSIBILITIES

When MyEyeDr.'s rapid expansion caused them to experience scattered deposit services, non-standard banking plans, and employee turnover, millions of dollars in cash became trapped in a headache of a complicated and broken cash ecosystem.

To fix this broken system, they needed the freedom to choose the financial institution, transportation modality, and DTS solutions that worked best for each location.

DTS isn't a one-size-fits-all, cookie cutter approach. We're committed to giving end-to-end cash visibility and insights to our customers, regardless of how much cash is being transported, how it's getting where it needs to go, or which bank or vault it's going to.

When you have options, you have power. We're here to provide cash solutions that work for you. We'll help you break the mold.

Let's build a cash plan that works for you.

Learn more about our cash solutions so you can free your cash to do more for you. Let's talk about what unique cash solution would unlock your cash power.

DTS Branch

The DTS Branch Solution allows customers to take their deposit to a local branch location for processing through the addition of MICR text on the updated DTS Deposit Advice.

DTS Branch connects the traditional DTS deposit tracking and reporting ecosystem to clients' account through an integration with their BAI file.

DTS Branch eliminates the manual deposit creation as the DTS Deposit Advice is the only physical documentation required for bank deposit, eliminating the need to purchase or print another deposit ticket.
