DTS®

Change Order Solution

Still keying in change orders?

Only if you like inconvenience, errors, and antiquated technology.

The DTS Change Order solution allows users to create, track, and manage change orders from any internet-connected device, giving customers increased automation and enhanced oversight.
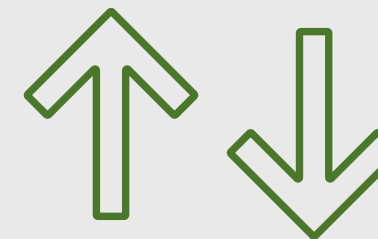

You can't manage what you can't measure, and you can't measure what you can't see.

standardize and automate

Standardize store change order processes across the organization and improve the store user experience by digitizing the change ordering process.

reduce and enhance

Reduce time spent on ordering change and enhance store productivity by eliminating VRU/IVR pin management.

track and analyze

Gain visibility, reporting, and analysis of all store change orders in real time, enterprise-wide.

NEXT STEPS

Because "no news" isn't "good news" when it comes to your cash.

Roadmap

Here's how you can move forward with the DTS Change Order Solution.

1

Share this document within your organization.

2

Watch and share this short video about our Change Order Solution.

3

Connect with your PSM or book a touch-base call with Vince Buscemi to outline your use case and design a pilot with DTS Change Orders. You can also email Vince directly at vbuscemi@dtsconnex.com
